

acquisition and development, early intervention through parent training, and program evaluation.

Ellen Sarnecky has joined the School Services Program as Director, Educational Planning Office. She is a doctoral candidate in Special Education Administration at Gallaudet College. She holds the Certificate of Clinical Competence in audiology and has special interests in programs for the deaf and hard of hearing in public schools. Ellen served as an audiologist in the Fairfax County Schools (VA) and has worked in the Division of Personnel Preparation at the Bureau of Education for the Handicapped and in the Governmental Relations Unit at the Council for Exceptional Children. She also has served as Assistant to the Director of Instructional Services at the Kendall Demonstration School for the Deaf where she designed and implemented programs in reading and career education.

### **SERVING COMMUNICATIVELY DISORDERED CHILDREN IN PRIVATE SCHOOLS**

P.L. 94-142 requires state and local education agencies to identify, locate, and evaluate all handicapped children. This requirement applies to children in private schools as well as public schools. A state or local education agency receiving Federal Funds cannot postpone identification and evaluation of private school handicapped children, charge parents for an evaluation, or force a child to enroll in a public school in order to receive services. Depending on state law, the delivery of services to private school children may be provided through a variety of arrangements such as dual enrollment, mobile services, or on the private school premises. Reports indicate that handicapped children enrolled in private schools may not be receiving all of the necessary special education and related services they need. Speech-language pathologists and audiologists in the schools should be aware of the state and local responsibility to serve communicatively handicapped children enrolled in private schools and are encouraged to obtain information on their state's procedures for delivery of services to handicapped children enrolled in private schools. This information can be obtained by contacting the State Department of Education, Division of Special Education.
